Books in the Free Public Library

THEY belong to the citizens of Newark. The more they are used intelligently, the better for the city. If you find any of them helpful to you, if they make your hours of leisure more agreeable, your work more efficient, your enterprise more profitable and your city more enjoyable, please tell others of the fact, and thus aid in making these books more useful still.

Do what you can to prevent rough handling, mutilation and theft among these books. A few persons, unhappily, are ready to do harm to such instruments of education and progress and pleasure as our fellow citizens provide in these books.

FORTY YEARS SOUGHT FOR!

No Soot! No Clinker! No Gas! No Nuisance!

THE GREENE

Soft Coal Cooking Stove!

This New Stove consumes all varieties of Bituminous Coal without forming Clinkers, Making Soot, Creating Gas or Nuisance of any kind, and is especially adapted to burn Slack Coal or Culm, Wood, Corn or Corncobs perfectly. It is a good COOKER, BAKER and BROILER; Quick in Operation, and possesses the merit of GREAT ECONOMY. In fact, it is Perfection in the way of a Cooking Stove. It is easily cared for—the grate is never dumped, no ashes to sift or clinkers to remove, is cleanly in its operations, and is of GREAT DURABILITY.

THE ANNEXED TESTIMONIAL IS ONE THE MANY RECEIVED.

From H. S. Chamberlain, Esq., President of the Roane Iron Company.

CHATTANOOGA, Tenn., Jan'y 11, 1880.

Gentlemen:

Hearing the Greene Stove highly spoken of as being very economical in fuel, and satisfactory for family use, I, some months since, procured a No. 9 Cooking Stove of this pattern, and after thorough trial find it even better than I had expected I have tested it carefully with all sorts of coal found in this section including the Tennessee, Dado, Soddy, Knoxville, Daisy, and Rockwood, and find that any of these can be burned, either fine or coarse, without clinker and with very great satisfaction. The stove is emphatically a smoke consumer, in which all gases usually wasted up the chimney are utilized and in point of economy I am within the mark when I say the amount of coal consumed for ordinary cooking and other kitchen purposes is less by one-half than in any other stove with which I am acquainted in the market. Its cooking qualities are supremely excellent. It is the only soft coal burner known to me which can be used pleasantly and economically in the kitchen, and being quickly heated and as free from dust and dirt as a wood stove, must, as soon as its merits are known, take the place of all other varieties. I am very glad to say this much for your stove, as it is gratifying to see an effort to apply valuable scientific principles in household economies meet with such merited success.

I am very truly yours,

H. S. CHAMBERLAIN.

This Stove meets a want long felt in those regions where Bituminous Coal is a prevailing fuel. As this important invention, covering the Eastern and Western Continents, is the property of a Newark Company, Citizens having friends in the Bituminous Coal burning regions are invited to apply to the Company for Circulars and Testimonials, and thus extend the knowledge of this Newark Industry.

PREFACE.

Through the canvass for this work we find the march of progress extending in every direction, but more particularly in the northern and western sections of the city. Many dwellings and factories are in course of construction; new industries are being added, and business in general is good. The population is estimated at 143,000. There is an increase of new names, while some residents have moved elsewhere. The death record is one most sad, some of our representative and most valued citizens having been removed from our midst—those who have been the most prominent in the advancement of Newark's welfare, especially in the exhibition of its industries which gave to Newark manufactures a world-wide renown.

Although it is gratifying to record the increase in population and in the manufacturing interests, still there is much that might be done to further increase Newark's prosperity by the opening of free highways and cheap transit between this city and the metropolis. The proposed ship canal through Bergen, to connect the waters of the Passaic and Hackensack rivers with that of the Hudson and the Bay of New York, would open a direct communication with the seaboard, and Newark, while she is a port of entry, would no longer be considered an inland city. This canal would result in the utilization of the vast extent of waste country lying between Newark and Bergen.

The frequency of orders for this work and letters of inquiry relative to the various interests of the city, received by the publisher from foreign cities, is evidence, not only of the increasing importance of Newark, and of the Directory as a representative work, but as a medium of information.

As a matter of general interest we have introduced on the following page Newark's relations to the treaty between this government and Mexico, as in the treaty there are many articles admitted free of duty, in which our Newark manufacturers are particularly interested.

For additional interest to citizens a map of railroad routes from New York to Washington, page 81, also to Greenwood Lake, opposite page 1160, also on the map of the city, a map showing the territory lying easterly between Newark and New York, with the various means of communication between these two cities, have been added, together with other matters of interest, for which we would refer to the Table of Contents on pages here following.

As to this work, should any omissions or discrepancies appear, citizens are cordially invited to communicate with the Directory Office, 11 Mechanic treet, as all alike are interested in having every one show their colors.

Maps of Newark, also of Essex County, may be obtained at the above office.

THE MEXICAN TREATY.

As the effect of the reciprocity treaty with Mexico is not generally understood, and as it will to some extent affect the interests of New Jersey, we give below its most salient points:

FREE GOODS FROM MEXICO.

The schedule of Mexican articles proposed to be admitted free of duty into the United States of America, in which New Jersey is immediately interested, are as follows: Animals, alive, specially imported for breeding purposes; beef, coffee, esparto, and other grasses, and pulp of, for the manufacture of paper; flowers, natural of all kinds; fruits, all kinds of fresh fruits, such as oranges, lemons, pineapples, limes, bananas, mangoes, etc.; goat skins, raw; hide ropes; hides, raw or uncured, whether dry salted or pickled, and skins, except sheep skins with wool on, Angora goat skins, raw without the wool, and asses' skins; India rubber, crude and milk of; indigo, jalap, leather, old scrap; logwood, berries, nuts, orchilla and vegetable for dyeing or used for composing dyes; molasses, palm or cocoanut oil, quicksilver, sarsaparilla, crude; straw, unmanufactured: sugar, not above No. 16, Dutch standard, in color; tobacco in leaf, unmanufactured; wood and timber of all kinds, unmanufactured.

FREE GOODS GOING TO MEXICO.

The schedule of the United States articles to be admitted free of duty into Mexico is as follows: Accordeons and harmonicas, anvils, bars of steel for mines, round or octagonal; barrows and hand trucks, with one or two wheels; brick refractory, and all kinds of bricks; books, printed, unbound or bound in whole or in greater part with paper or cloth; beams, small, and rafters of iron for roofs, provided that they cannot be made use of for other objects in which iron is employed; cars and carts with springs, coaches and cars for railways, crucible and melting pots of all materials and sizes, cane knives, clocks, mantel or wall; diligences and road carriages of all kinds and dimensions; fire pumps, engines and ordinary pumps for irrigation and other purposes; faucets, hoes, mattocks and their handles; houses of wood or of iron complete; hoes, common agricultural knives without their sheaths, scythes, sickles, harrows, rakes, shovels, pickaxes, spades and mattocks for agriculture; iron and steel made into rails for railways; scientific instruments; locomotives; lithographic stones; machines and apparatus of all kinds for industrial, agricultural and mining purposes, sciences and arts; and separate parts or pieces pertaining thereto. The extra or separate parts of machinery and the apparatus that may come united or separately with the machinery are included in this provision, comprehending in this the bands of leather or rubber that serve to communicate movement, but only when imported at the same time with the machinery to which they are adapted; moulds and patterns for the arts, naphtha, oars for small vessels, plows and plowshares, petroleum or coal oil and its products for illuminating purposes; powder, common, for mines; roof tiles of clay or other material, sulphur, stoves of iron, for cooking and other purposes, soda, hyposulphite of; steam engines, sewing machines, slates for roofs and pavements, tools and instruments of iron, brass or wood, or composed of these materials for artisans; wire, telegraph; wire of iron or steel, for carding; wire, barbed for fences, and the hooks and nails to fasten the same; water pipes of all classes, materials and dimensions, not considering as comprehending among them tubes of copper or other metal that do not come closed or soldered with seam or riveting in all their length; window blinds, painted or not painted.

G. H. Bosch's Pure Domestic Wine

FOR MEDICINAL AND COMMUNION PURPOSES.

REASONS WHY Physicians recommend this Wine in preference to all others:

FIRST—It is no imitation of any Foreign Wine.

SECOND—You buy it direct from the manufacturer, who sees to every detail himself, from the purchasing of the fruit to the time of bottling.

THIRD—There is not a drop of Alcohol used in its manufacture, nor any adulterations, it is therefore the Purest Wine in use. It is not an intoxicating but invigorating Wine, a pure blood strengthening tonic, to be had only in its purity.

The Newark Electric Light and Power Co.

Nos. 31 and 33 Mechanic Street, Newark, N. J.

ELECTRIC LIGHT

FOR STORES, FACTORIES AND PUBLIC BUILDINGS.

THE WESTON ARC SYSTEM, which has been used in this city the past three years, having been greatly improved, we can now guarantee a steady and reliable light. The light from the Weston system is perfectly white, and thoroughly diffused, with none of the blue and violet rays so objectionable in other lamps. From its near approach to natural light the slightest difference in colors can be readily distinguished. We would call attention to our INCANDESCENT SYSTEM; parties having their own power can use this light at a price which compares favorably with the cost of gas.

Further information can be obtained at the office of the Company, 31 Mechanic Street.

CROWELL & COE, IRON AND STEEL,
106 & 108 Mulberry Street, cor. Clinton.

Established 1874.

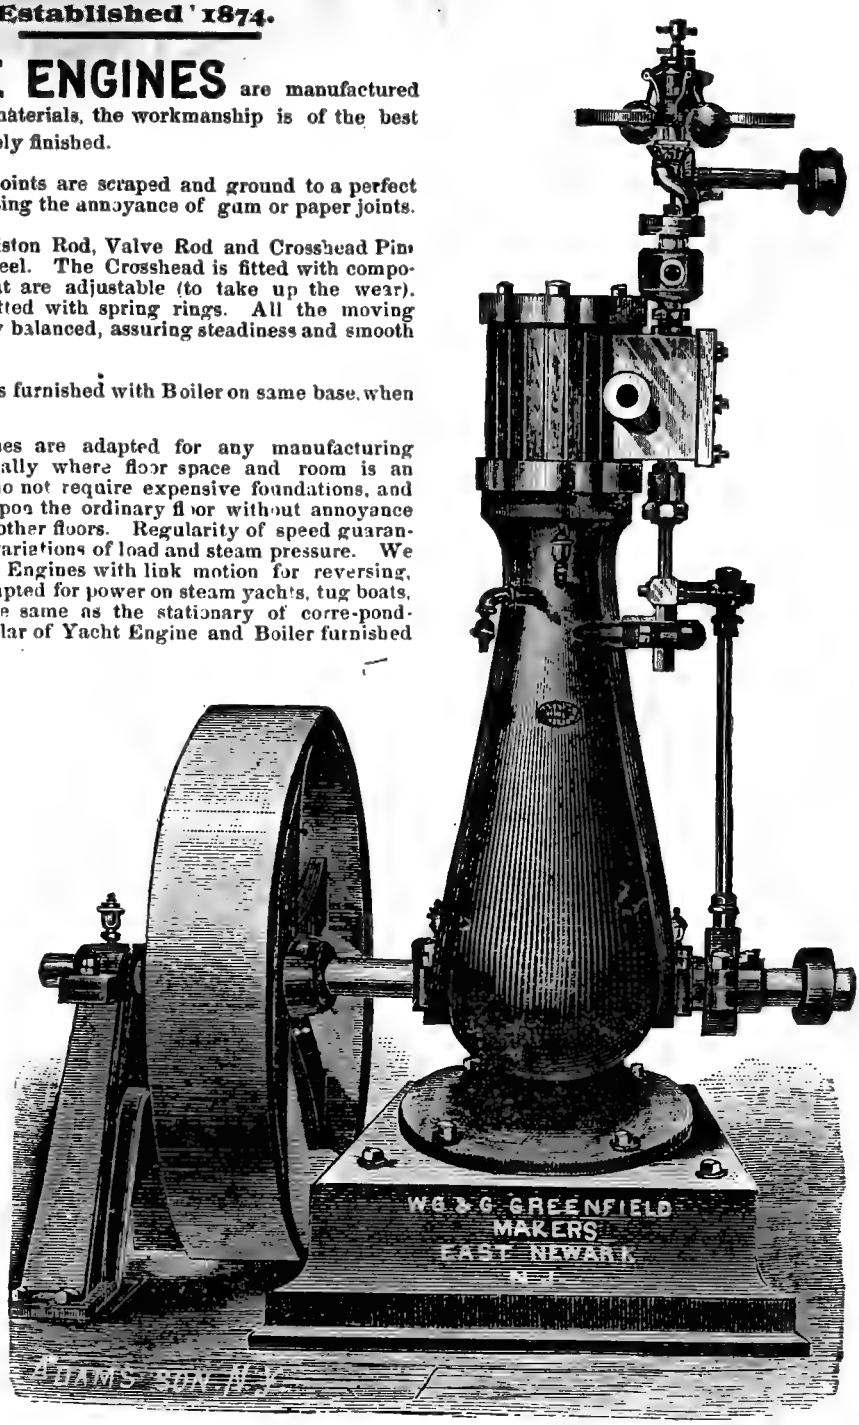

THESE ENGINES are manufactured from the best materials, the workmanship is of the best quality and finely finished.

The Steam Joints are scraped and ground to a perfect bearing, obviating the annoyance of gum or paper joints.

The Shaft, Piston Rod, Valve Rod and Crosshead Pin are of forged steel. The Crosshead is fitted with composition gibbs, that are adjustable (to take up the wear). The Piston is fitted with spring rings. All the moving parts are evenly balanced, assuring steadiness and smooth running.

The Engine is furnished with Boiler on same base, when called for.

These Engines are adapted for any manufacturing purpose, especially where floor space and room is an object. They do not require expensive foundations, and can be placed upon the ordinary floor without annoyance to those on the other floors. Regularity of speed guaranteed under all variations of load and steam pressure. We also make these Engines with link motion for reversing, and are well adapted for power on steam yachts, tug boats, &c. Prices the same as the stationary of corresponding size. Circular of Yacht Engine and Boiler furnished on application.

This style represents the 2½ to 60 Horse Power Engines.

Patent Malleable Iron (Hollow Munten) Window Sash,

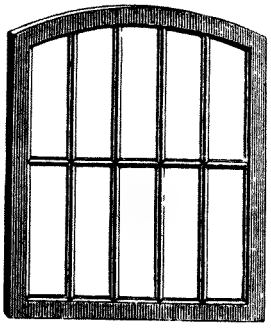

For Insane Hospitals, Fire Proof Buildings, &c.

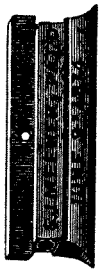

End view of Munten for Glazed Sash.

End view of Munten for Unglazed Sash.

Hollow Munten.

The use of these sashes gives perfect security without the usual gratings that have a prison-like appearance. Wherever introduced, both Architects and Medical Superintendents testify to their worth.

Among the many Institutions where the above sash is in use, are:

The Iowa Hospital for Insane, Independence, Iowa.
State Asylum for Insane, Morristown, N. J.
State Hospital for Insane, Danvers, Mass.

The Association does not distribute alms. It aims to aid all established benevolent agencies of whatever creed, and every individual donor, to a more intelligent and efficient care of the poor.

It endeavors to exterminate giving to unknown persons, to punish fraud, and to secure for every worthy case of poverty in the city one friendly visitor, who shall report its circumstances monthly to a body representing all the organized and very much of the individual charity of Newark.

It offers to furnish gratuitously to proper inquirers, information concerning every applicant for charity, upon request, through an investigation ticket given to the applicant, and its already large store of information concerning thousands of cases will be augmented in proportion to your command of its services.

ELECTION OF PRESIDENT AND VICE PRESIDENT OF THE UNITED STATES.

ELECTORAL COLLEGE

"The voters elect in the several States as many persons as there are members of Congress, known as Electors. These electors meet at the State Capitols upon a fixed day, and cast the electoral vote of the State for President and Vice President. Copies of this vote are sent by messenger to the United States Secretary of State and to the President of the United States Senate, and opened and counted at a joint meeting of both Houses of Congress in February following the election. The persons receiving the majority of the electoral votes for the two offices are declared duly elected President and Vice President of the United States for four years from the ensuing 4th of March. In case no party has a majority of the electoral vote, the election is made by the House of Representatives alone, each State casting one vote (which is controlled by a majority of the Electors), and a majority of all the States is necessary to a choice."

No Senator or Representative, or person holding an office of trust or profit under the United States is eligible for an Elector.

Money Orders to Switzerland—Not exceeding $10, 15 cents; over $10 and not exceeding $20, 30 cents; over $20 and not exceeding $30, 45 cents; over $30 and not exceeding $40, 60 cents; over $40 and not exceeding $50, 75 cents.

No fractions of cents to be introduced in an order.

United States Treasury notes or National Bank notes only received or paid.

Post Money Orders, for sums not exceeding $100 each order, can be obtained at the principal offices throughout the country. The use of these orders, by persons who desire to make remittances by mail, is far preferable to sending money, even when the letter containing it is registered. By the money order system, *absolute security* against loss is obtained. Money orders are good for one year from the date of issue. In case of their loss, no charge is made for the issuing of duplicates. Persons sending money orders should be careful never to send them in a letter which contains the name of the person from whom they are sent. This is necessary in order to guard against loss in case the letter should fall into improper hands; money orders *never* being paid to any person who cannot tell the name of the party to whom they were issued.

Postal notes for the transmission of small sums under five dollars, on which a fee of three cents shall be charged, were issued about October 1, 1883.

As letters are frequently dropped in the letter-boxes insufficiently paid, persons who are not certain in regard to weight, rates, etc., would do well to inquire of the Stamp Clerk before mailing them. If sent to the Dead Letter Office they are delayed two or three mails.

The object of this institution is to reform boys and girls committed by the Police Justices, for truancy and such conduct as indicates they are beyond the control of parents. It is a public reformatory supported by the city, taking children viciously inclined, and inuring them to habits which tend to lives of usefulness. The Home is in no sense like a prison, but the intent is to make it what its name implies, a "home" for wayward children.

POSTOFFICE INFORMATION.

FIRST GLASS MAIL MATTER.

This includes letters and all mail matter in the nature of personal correspondence, all manuscript copy for books, newspapers, etc., (except when accompanying printed proof-sheets of the same), all matter in a sealed package, or that is so enclosed that the contents cannot be examined without injuring the wrapper; all matter wholly or partly in writing (except as hereinafter provided), and paintings and drawings produced by hand.

On mailable matter of the first class, except postal cards and drop letters, postage must be prepaid at the rate of TWO CENTS FOR EACH HALF OUNCE OR FRACTION THEREOF. Drop or local letters, at postoffices having carriers, two cents per half ounce or fraction thereof; at offices having no carriers one cent per half ounce.

Letter rate of postage will be charged on all matter that has any communication in writing, or by any signs except those noted under "second," "third" or "fourth" class mail matter, and upon all matter that is so enclosed that it cannot be examined without destroying the wrapper.

The postage of one cent each is paid by the stamp impressed on postal cards, and no further payment is required.

No card is a "postal card" except such as are issued by the postoffice department. An ordinary printed business card may be sent through the mails when prepaid by a one cent postage stamp attached; but such card must contain absolutely no written matter except the address, otherwise it will be treated as not fully prepaid, and refused admission into the mails.

SECOND GLASS MAIL MATTER.

NEWSPAPER AND PERIODICAL PUBLICATIONS.—The rates on mailable matter of the second class apply only to newspapers and periodical publications sent regularly by the publishers to their subscribers. Two cents a pound, payable at office of mailing.

THIRD GLASS MAIL MATTER.

MISCELLANEOUS PRINTED MATTER.—Mailable matter of the third class includes books, transient newspapers, and periodicals, circulars and other matter wholly in print, (not of the second class), proof-sheets, corrected proof-sheets and manuscript copy accompanying the same, (but manuscript unless so accompanied is charged at letter rates), also engravings, photographs, chromos, lithographs, and matter reproduced by hectograph or other similar process when not in the nature of personal correspondence, and postage shall be paid at the rate of ONE CENT FOR EACH TWO OUNCES OR FRACTIONAL PART THEREOF, and shall be fully prepaid by postage stamps affixed to such matter.

All packages of matter of the third class must be so wrapped or enveloped, with open sides or ends, that their contents may be readily and thoroughly examined by postmasters without destroying the wrapper.

Matter of the third class inclosed in sealed envelopes notched at the ends or sides, or with the corners cut off, cannot be mailed except at letter postage rates.

Single books in separate packages which weigh in excess of four pounds are admitted.

"Printed matter" is defined to be the reproduction upon paper, by any process except that of handwriting or copying press, of any words, letters, characters, figures or images, or of any combination thereof, not having the character of an actual and personal correspondence.

Packages of matter of this class may weigh not exceeding four pounds, single books excepted as above.

FOURTH GLASS MAIL MATTER.

MERCHANDISE, SAMPLES, ETC.—Mailable matter of the fourth class includes all matter not embraced in the first, second or third class, which is not in its form or nature liable to destroy, deface, or otherwise damage the contents of the mail bags, or harm the person of any one engaged in the postal service.

Other articles of the fourth class which, unless properly secured, might destroy, deface, or otherwise damage the contents of the mail bag, or harm the person of any one engaged in the postal service, may be transmitted in the mails when they conform to the following conditions:—1st. They must be placed in a bag, box, or removable envelope made of paper, cloth, or parchment. 2d. Such bag, box, or envelope must again be placed in a box or tube made of metal or some hard wood, with sliding, clasp, or screw lid. 3d. In case of articles liable to break, (as of glass), the inside box, bag or envelope must be surrounded by sawdust, cotton, or spongy substance. 4th. In cases of sharp pointed instruments, the points must be capped or encased, so that they may not by any means be liable to cut through their enclosure; and where they have blades, such blades must be bound with wire, so that they shall remain firmly attached to each other. 5th. The whole must be capable of easy inspection.

All matter of the fourth class is subject to a postage charge at the rate of ONE CENT AN OUNCE OR FRACTION THEREOF, to be prepaid by stamps affixed.

Packages of matter of the fourth class may weight not exceeding four pounds.

REGISTRATION.

All kinds of postal matter can be registered, except "second class matter," at the rate of ten cents for each package, in addition to the regular postage rates.

MONEY ORDER RATES.

Money orders are issued and are payable at any money order postoffice in the United States upon which they may be drawn.

If a money order is lost, a certificate should be obtained from both the paying and issuing postmasters that it has not been paid and will not be paid, and the Department at Washington will issue another on application.

If a money order is not collected within one year from date it is invalid, and the amount thereof can only be paid by means of a duplicate issued by the Department at Washington on application through the postmaster who issues or pays it.

Not more than three orders will be issued in one day to the same remitter and in favor of the same payee payable at the same postoffice.

Current money of the United States only received or paid on money orders.

A SIMPLE MODE OF COMPUTING INTEREST.

Multiply any given number of dollars by the number of days of interest required, separate the right hand figure and divide by six. The result is the true interest for such a number of days at six per cent. This rule is simple and true, according to all business usages. There being no such thing as a fraction in it, there is scarcely any liability to error or mistake; and by no other arithmetical process can such desired information be obtained with so few figures.
